**Dr Timothy Leary FRCA FFICM
Consultant in Anaesthesia and Intensive Care Medicine**

Professional qualifications:

I qualified in Medicine at Cambridge University in 1992. I am a fellow of the Royal College of Anaesthetists (1997) and of the Faculty of Intensive Care Medicine (2011). I am currently a Consultant Anaesthetist and Intensive Care Specialist employed by the Norfolk and Norwich University NHS Foundation Trust. I was appointed to this position in 2001.

NHS Consultant appointments:

I am currently a Consultant Anaesthetist and Intensive Care Specialist employed by the Norfolk and Norwich University NHS Foundation Trust. I was appointed to this position in 2001. I maintain a broad spectrum of anaesthetic and critical care practice.

Within the specialty of Critical Care, I have a particular interest in the early recognition and management of the acutely deteriorating patient. I am consulted both locally and regionally on matters relating to optimal end of life care within the critical care unit.

Private practice:

I am a partner of Norwich Anaesthetists Group. I provide general and regional anaesthesia at the Spire Hospital Norwich and at the Norfolk and Norwich Hospital, for a wide spectrum of surgical disciplines.

Presentations:

My most recent presentations have focussed on learning within the critical care environment, care of patients prior to cardiac arrest, management of sepsis and the optimal care of patients within critical care at the end of life.

Positions held:

I have acted as Clinical Lead for Organ Donation, Director of Critical Care and am currently the Chief of Service for the Surgical Division at the Norfolk and Norwich Hospital.

Expert witness training:

I have attended training to ensure that my reports are of the highest quality (Professional Solutions 2012), and that my evidence be best delivered (Bond Solon 2015).

Medicolegal report writing experience:

I prepared evidence for the Court in matters of clinical negligence associated with general anaesthesia and the care delivered immediately prior to and during critical care admission.
